

Sunidhi Rusia - Master Professional Portfolio & Database

Contact & Profile

- **Email:** sunidhirusia22@gmail.com
- **LinkedIn:** www.linkedin.com/in/sunidhi-rusia
- **Location:** Hoboken, New Jersey, United States

1. Professional Summary Currently pursuing a Master's degree in Business Analytics and Artificial Intelligence at Stevens Institute of Technology, with an expected graduation in May 2027. Engaged as a Volunteer Research Assistant, gaining experience in research and enhancing skills in business analytics and communication. Previous roles include Marketing Research Analyst at OmniScience Capital Advisors Pvt. Ltd., where contributions supported data-driven insights, and Teaching Assistant at Shri Shankaracharya Technical Campus, leveraging knowledge in Python programming. Dedicated to developing expertise in data analytics and technology to enable informed decision-making. Bridges the gap between complex AI logic and actionable business strategy with hands-on experience in machine learning and enterprise agentic AI orchestration.

2. Technical Skills

- **Top Skills:** Experimental Research, Large Language Models (LLM), Test Automation.
- **Programming:** Python, R, SQL, MySQL, Java.
- **Data & Analytics:** Pandas, Scikit-learn, XGBoost, Tableau, Power BI, Metabase, Mixpanel, Predictive and Statistical modeling (linear/logistic regression), Excel/Google Sheets.
- **Cloud & Data Engineering:** AWS S3 (data extracts), Supabase, Data Warehousing, Data Engineering.
- **AI & Agentic Orchestration:** Microsoft Copilot Studio, Azure OpenAI, Claude API, Llama-3.3-70B, Prompt Engineering, NLP.
- **Project Management:** Scenario Analysis, Stakeholder Communication, Agile & Scrum, SDLC.
- **Certifications:** Intermediate Python, Data Manipulation with Pandas.

- **Web Development:** Next.js, Streamlit.

3. Education

- **Stevens Institute of Technology** | Master's degree, Business Analytics and Artificial Intelligence (September 2025 - May 2027).
- **Shri Shankaracharya Technical Campus** | Bachelor's degree, Computer Science (October 2021 - July 2025).

4. Academic Coursework & Grades (Stevens Institute of Technology)

- **MIS 637:** Data Analytics and Machine Learning (Prof. Mahmoud Daneshmand) | Grade: A (4.0)
- **BIA 650:** Optimization and Process Analytics (Prof. Somayeh Moazeni) | Grade: A- (3.67)
- **BIA 568:** Management of AI Technologies (Prof. Wayne Huang) | Grade: A (4.0)
- **BIA 686:** Practicum in Analytics (Prof. Anand Rai) | Grade: A (4.0)
- **BIA 672:** Marketing Analytics (Prof. Eunkyung An) | Grade: B+ (3.33)
- **BIA 674:** Supply Chain Analytics (Prof. Alkiviadis Vazacopoulos)
- **BIA 654:** Experimental Design II (Prof. Choudur Lakshminarayan)
- **MGT 808:** Fundamentals of Consulting (Prof. Patricia Saporito)
- **MIS 636:** Data Integration for BI&A (Prof. Joseph Morabito)
- **Additional Enrolled/Completed Courses:** MGT 809 (Industry Capstone Experience), BIA 652 (Multivariate Data Analysis I), BIA 810 (Special Topics in BIA).

5. Professional Experience

- **Teaching Assistant | Stevens Institute of Technology (March 2026 - Present)**
 - Graded papers and assignments, ensuring compliance with faculty standards and providing constructive feedback.

- Monitored course content for issues, documenting resources needing improvement for continuous enhancement.
 - Prepared weekly summaries of student inquiries, identifying trends to support course development and student success.
 - Synthesizing weekly performance data for 150+ students to identify 'at-risk' learners, designing and executing data-driven pedagogical interventions that closed AI comprehension gaps and improved overall cohort retention.
 - Managing the evaluation of AI projects with a focus on technical accuracy and the core pillars of Fairness and Accountability.
 - Partnering with faculty to optimize course content through systematic edge-case testing and statistical validation to ensure rigorous AI model performance and reliability.
- **Volunteer Research Assistant | Stevens Institute of Technology (November 2025 - Present)**
 - Contributed as a Volunteer Research Assistant, focusing on the evaluation of an AI-powered Knowledge & Career Explorer platform.
 - Assessed system accuracy and usability, which led to a 30% enhancement in learning effectiveness.
 - Supported academic research by validating machine learning models and collaborating with faculty to optimize curriculum based on research insights.
 - Driving the continuous improvement of AI research features by integrating market research insights with direct user feedback, establishing validation frameworks that ensured product-market fit.
 - Orchestrating seamless user activation and onboarding strategies, conducting high-impact product demos to streamline user management.
 - Leveraging user analytics to identify performance gaps, contributing to 25% faster research workflows.
- **Marketing Research Analyst | OmniScience Capital Advisors Pvt. Ltd. (December 2024 - August 2025)**

- Conducted comprehensive market and customer research across 10+ financial products, supporting multiple investment and branding initiatives.
 - Analyzed over 1,000 data points from industry reports and surveys to identify key market trends.
 - Delivered actionable insights that improved campaign targeting accuracy by 15% across three departments.
 - Collaborated with cross-functional teams to enhance strategic decision-making at OmniScience Capital Advisors Pvt. Ltd..
- **Teaching Assistant | Shri Shankaracharya Technical Campus (January 2024 - December 2024)**
 - Played a pivotal role in enhancing student engagement by assisting in the development of a voice-enabled AI assistant.
 - Leveraged speech recognition and natural language processing to improve automation accuracy and reduce system latency.
 - Supported student learning in AI and ML concepts and fostered a collaborative and innovative educational atmosphere.

6. Key Academic & Technical Projects

- **StartupHub: AI-Driven Talent Discovery Platform (Jan 2026 - May 2026):** Architected platform using Next.js, Supabase, and a 3-stage Claude API pipeline to aggregate 3,500+ active roles across 140+ verified YC-backed companies via 40 integrated endpoints. Engineered custom round-robin filtering and predictive insights to uncover 552+ stealth startup roles. Automated candidate outreach by combining SERP API contact discovery with a Claude-powered cover letter generator using a 40-20-20-20 semantic matching rubric.
- **AI-Based Flight Delay Prediction Model (Oct 2025 - Dec 2025):** Developed an AI-driven prediction model to forecast flight delays using historical airline, weather, and airport operations data. Utilized Python for data preprocessing, feature engineering, and machine learning modeling (Logistic Regression, Random Forest, and XGBoost) to capture temporal patterns. Achieved 88–92% prediction accuracy, enabling proactive mitigation and improving passenger scheduling efficiency by 25%.
- **Athenica Generative AI Capstone (Fall 2026):** Architecting enterprise AI solutions for environmental engineering alongside Gena Dongaris. Designing Phase I ESA

automation and a NYC regulatory copilot using an on-premise Llama-3.3-70B model deployed behind an air-gapped VPN for strict NIST/EPA data compliance.

- **Agentic Design Thinking Coach (Summer 2026):** Multi-phase conversational agent system designed in Microsoft Copilot Studio, integrating Azure OpenAI, Power Automate, and SharePoint.
- **Historacle Analytics Dashboard (Spring 2026):** Streamlit predictive retention dashboard using logistic regression to classify churn risk, integrating pop-culture frameworks.
- **Climate-Resilient Brewing AI (Summer 2025):** Developed a Python prediction model to optimize brewing parameters dynamically under varying climate conditions.
- **Business & Supply Chain Analytics Cases:** Modeled network design and optimization for Coolwipes (\$61.75M baseline analysis, Atlanta expansion), Amazon's delivery ecosystem evolution, and evaluated Walmart logistics strategies. Analyzed Performance Improvement Consulting (PIC) and the Hi-R-Me sales call case studies.
